

**My Action Plan for Next Steps**

Name: \_\_\_\_\_

**Defining your watershed process**

What are 3 key features you would like to incorporate into your planning process?

**Watershed Characterization**

<i>Quick checklist of skills have or needed</i>	<i>I have the skill</i>	<i>We have the skill</i>	<i>We need help</i>
Focusing the data gathering effort			
Delineate watershed and other mapping skills			
Gathering existing data			
Conducting field reconnaissance			
Synthesizing data			
Drafting causes and sources of impacts			
Drafting assets			

**Partnership and Engagement**

List 3 important partners that you have not engaged with yet. What is the next step for you or your organization to reach out to at least one of these partners?

**Goals and Objectives**

Write one draft goal and the steps you may take to solidify this goal among your partners.

**Implementation**

Reflect on 3 things that could be barriers to implementation. Write down how you might minimize those barriers through your planning process.

**Resources and Support**

List one resource you need to take your next step in the process. Who might serve as that resource or how might you identify that person or organization?

**9 Element Plan**

Do you foresee developing a 9 element plan?  
What additional information, skills, or resources might you need to proceed?

Below list your next 5 tasks to move your planning and watershed improvement process forward.
